Journal of Soil and Water Conservation
Index to Volume 51

1993 Midwest Floods
and mapping sand deposition with electromagnetic induction instruments, 336
Aase, J.K. (see Pikul, J.L., Jr.)
Aase, J.K. (and G.M. Schaefer), Economics of tillage practices and spring wheat and barley crop sequence in the Northern Great Plains, 167
Abdalla, C.W. (and T. W. Kelsey), Breaking the impasse: Helping communities cope with change at the rural-urban interface, 462
Adams, P.W., Addressing forestry issues for the future: A vision for coordinated research, education, and assistance programs, 126

Adoption
and conservation practices by upland farmers in the Dominican Republic, 249
and factors affecting farmers' use and rejection of banded pesticide applications, 322
and improving acceptability to farmers in low-income countries of soil conservation practices, 309

Adoption of soil conservation technologies
and linking productivity and conservation, 313

Agencies
The public and federal natural resource agencies, abstract, 350

Agrichemicals
Alternative measures of pesticide use by tillage system, abstract, 347
A turn up in Garden County, abstract, 357
Cost assessment and means of averting environment damage and groundwater contamination by farmland nitrate seepage, abstract, 351
and gully treatment and water quality in the Southern Plains, 498
Historical (1983-1992) metolachlor surface water monitoring, abstract, 355
Overwinter movement of metolachlor in seasonally frozen soils, abstract, 347
Reducing herbicide losses from tile-out terraces, abstract, 347
Alexander, D.L. (see Indorante, S.J.)

Alfalfa
increasing production of by using a tall wheatgrass windbreak system, 439

Alfisols
and the effect of erosion on morphology and classification of soils in the North Central United States, 171

Algal-available phosphorus
and determining environmentally sound levels for soil, 160
Allen, P.M. (see Byars, B.W.)
Allen, L., The Malpal borderlands partnership, Arizona and New Mexico: A community-based ecosystem planning project, abstract, 350

Alternative agriculture
and evaluations of two central Iowa farms, 66
and potential water contamination, 329

AML (Abandoned Mined Lands)
and encouraging re-mining and reclamation of, 8
Anderson, J. (see Prout, T.)
Anderson, V.S., Case study of establishing a watershed-based decision-making process, abstract, 359

Animal manure
and determining environmentally sound soil phosphorus levels, 160

Ap horizon clay content
and the effect of erosion on morphology and classification of soils in the North Central United States, 171

Ap horizon color
and the effect of erosion on morphology and classification of soils in the North Central United States, 171
Armstrong, T.D. (and H.M. Jacobs), Centralized growth management policy and local land-use decision making: Learning from Oregon's experience, 285
Aronoff, A. (see Scott, J.G.)
Ashby, J. A. (and J. A. Beltran, M. del Pilar Guerrero, and H.F. Ramos), Improving the acceptability to farmers of soil conservation practices, 309

Assistance programs
and research and education coordination on forestry issues, 126

Atrazine
and an evaluation of Wisconsin's groundwater protection strategy, 94
and potential water contamination from conventional and alternative cropping systems, 329

Austria
Determination of erodibility parameters for Austrian soils, abstract, 355
Runoff and erosion under different tillage systems in Austria, abstract, 358
Ayen, J., Obstacles and innovations in entering about 50,000 acres into the EWRP and WRP, abstract, 354
Bahl, D., Partnerships with non-traditional groups for success, abstract, 348

Banded pesticide applications
and factors affecting farmers' use and rejection of, 322
Barboso, R. (see Tyler, D.D.)
Barker, J.R. (and G.A. Baumgardner, D.P. Turner, and J.J. Lee), Carbon dynamics of the Conservation and Wetland Reserve Programs, 340
Barnard, C. (see Sandretto, C.)
Barratt, R.E. (see Sheng, T.)
Barrett, J. (and M. Nearing), Decision support to improve management for sustained production and agriculture using erosion prediction and information technologies, abstract, 356
Bauer, Kurt W., Creating integrated rural resource land information systems, 29
Bauer, Phillip J. (see Busscher, W.J.)
Baumer, O.W. (see Zartl, A.)
Baumer, O.W. (see Klik, A.)
Baumgardner, D.P. (see Barker, J.R.)

Bedrock topography
and using ground-penetrating radar as a tool for mapping in the Sabie River, Kruger National Park, 234
Begstrom, J. (see Sun, H.)
Beltran, J. A. (see Ashby, J. A.)
Benjaminson, K.E. (and E. Johnson and A.G. Thomas), Application of GIS technology to develop a framework for a persistent perennial weed biocontrol program in NW Saskatchewan, abstract, 356
Berg, N., What is today's meaning of environmental stewardship, abstract, 358
Bergkamp, G. (see Kirkby, M.J.)
Bernard, J. (see Lafayette, R.A.)
Berry, J. (and J. Gordon), The public and federal natural resource agencies
Betts, L., Putting it all together locally for a strong wetlands restoration program, abstract, 354
Betts, L., Using public information and education materials to recruit non-farm volunteers to participate in wetlands enhancement, abstract, 355
Binder, D.M. (see Shamblen, R.G.)
Bingham, N.L. (see Byars, B.W.)
Birkhead, A.L. (and G.L. Heritage, H. White, and A.W. van Nierkerk), Ground-penetrating radar as a tool for mapping the phreatic surface, bedrock profile, and alluvial stratigraphy in the Sabie River, Kruger National Park, 234

Biodiversity
SWCS Policy Position Statement, 205
Blair, J.M. (and L. McSherry), Sustainable agriculture in the southwest United States and its relationship to landscape planning, 280

Biocontrol
Application of GIS technology to develop a framework for a persistent perennial weed biocontrol program in NW Saskatchewan, abstract, 356

Bioengineering
Whetstone Creek soil bioengineering site, abstract, 352

BMP (Best Management Practices)
and the cost-effectiveness of conservation and nutrient management practices in Pennsylvania, 486
and water quality education for owners of small ranches, 41
Boardman, J. (see Poesen, J.W.)
Bolton, F.E. (see Schillinger, W.F.)
Bos, A.W. (see Wall, G.J.)
Brady, S.J. (and C.H. Flather) Land-use intensity and patterns of avian diversity, abstract, 351

Brazil
and using cover crops to decrease erosion and increase infiltration, 188
Strategies for succesful conservation programs: the Parana State (Brazil) case, abstract, 357
Brooks, K. (see Neppl, T.G.)
Bruckerhoff, S. (see Dewald, C.L.)
Buchan, G.D., Ode to H-0, 467
Buessler, P. (see Koehler, T.A.)
Busscher, W.J. (and D.W. Reeves, R.A. Kochhann, P.J. Bauer, G.L. Mullis, W.M. Clapham, W.D. Kemper, and P.R. Galerani), Conservation farming in southern Brazil: using cover crops to decrease erosion and increase infiltration, 188
Bragagnolo, N. (see Roloff, G.)
Brierley, J.A. (and J.C. Hiley, and W.W. Pettapiece), Land systems: An ecological approach to land management, abstract, 348
Bull, L. (see Sandretto, C.)
Burgdoff, D.W. (see Cousin, F.T., Jr.)
Byars, B.W. (and P.M. Allen and N. L. Bingham), A portable rainfall simulator for assessing infiltration, 508

Calibration
and GCTE validation of soil erosion models for global change studies, 397
Cammeraat, L.H. (see Kirkby, M.J.)

CAMPS (Computer-Assisted Management and Planning System)
and creating integrated rural resource land information systems, 29

Carbon dynamics
of the Conservation and Wetland Reserve Programs, 340

Carbon sequestration
and dynamics of the Conservation and Wetland Reserve Programs, 340
Carr, C.J. (see Cole, C.)
Carrasco, D.A. (see Witter, S.G.)

The Catchment Approach (Kenya Ministry of Agriculture)
a participatory impact study and self evaluation of , 265

Channel relocation
and stream restoration, 119

Chemically dependent agriculture
and sustainable agriculture in the southwest United States and its relationship to landscape planning, 280

Chesapeake Bay Program
and the cost-effectiveness of conservation and nutrient management practices in Pennsylvania, 486

Citizen involvement
and centralized growth management policy and local land-use decision making as in Oregon, 285
Claassen, R. (see Wiebe, K.D.)
Clapham, W.M. (see Busscher, W. J.)

Clearcut mapping
within a forested watershed (remote sensing of), 423

Climactic changes
and the GCTE Soil Erosion Network, 377

Climate
and scaling up processes and models from the field plot to the watershed and regional areas, 391
and trail degradation as influenced by environmental factors, 130
Cole, C. (and C.J. Carr), The use of GIS in holistic land-use planning for multidisciplinary integrated rural development in KwaZulu/Natal, South Africa, abstract, 356
Coleman, G.A. (see Sharpley, A.)
Comis, D., Green remediation: Using plants to clean the soil, 184

Communication
and centralized growth management policy and local land-use decision making as in Oregon, 285
Evaluation of public support models to assist private entrepreneuship in delivering site-specific, integrated crop management information and service, abstract, 348

Communications channels
and adoption and sustained use of conservation practices by upland farmers in the Dominican Republic, 249

Community-based agriculture
and preserving and enhancing the Padilla Bay agriculture/estuarine ecosystem, 274

Community-based management
and farm production systems of Mennonite and non-Mennonite land owner-operators in Ohio, 71

Community conflict
and helping communities cope with change at the rural-urban interface, 462
Community mobilization
and sustainability indicators and soil conservation as observed in The Catchment Approach, Kenya, 265
Complex topography
A GIS procedure for automatically calculating the USLE LS factor on topographically complex landscape units, 427
Composting
and mortalities, crop residues and manure as used in United States agriculture, 194
On-farm composting as a livestock manure management alternative, abstract, 347
and a profile of a New York dairy farm, 34
Computer program
Using a GIS procedure to automatically calculate the USLE LS factor on topographically complex landscape units, 427
Conflict resolution
and helping communities cope with change at the rural-urban interface, 462
Conservation
and environmental accomplishments relative to early ideas, abstract, 360
and sustainability at the crossroads, (commentary), 471
and sustainability, (commentary), 288
and sustainability practices by upland farmers in the Dominican Republic, 249
Conservation compliance
and the changing policy environment for soil conservation, abstract, 349
Conservation policies
and the Conservation Reserve Program (commentary), 140
After 60 years of soil conservation policies, should we really continue the same kinds of programs? abstract, 360
Ninety years of multiple uses: Putting public lands to work for the American people, abstract, 360
Conservation tillage
and changes in carbon content of a Norfolk loamy sand, 255
and using cover crops to increase infiltration and decrease erosion, 188
Constance, D.H. (see Rikoon, J. S.)
Contamination
and using plants to clean the soil, 184
Contant, C.K. (and M.J. Donahue), Learning from our experience: Determining watershed planning program effectiveness, abstract, 356
Cornbelt states
and an assessment of WQIP's chances for acceptance by farmers, 494
Cobourn, J. (and S. Donaldson), Water Quality education for owners of small ranches, 41
Cobourn, J. (and S. Donaldson) An educational program to involve owners of small ranches in water quality improvement, abstract, 349
